cosmética natural

## SIGNATURE NATURAL COSMETICS BASED ON AYURVEDA, BACH FLOWER REMEDIES AND AROMATHERAPY

Terai Cosmética is a natural cosmetics firm whose products are made in a laboratory in the centre of Bilbao by Dr. Verónica García, who drew on scientific literature to formulate them based on philosophies, such as Ayurveda, Aromatherapy and Bach Flower Remedies. Dr. García's aim is to care for our skin inside and out in a healthy way, using plant-based and organic ingredients.

Terai is named after an ecoregion in the Himalayas that runs through India, Nepal and Bhutan. Terai means wet land and is a forest ecosystem of permeable rocks that accumulate water during the monsoon season and release it in the form of springs.

The beautiful bamboo packaging contains formulas with an emotional contribution that will care for our skin and our spirit holistically. Dermatologically tested on humans, the results have been extremely positive.

# SCIENCE AND HOLISTIC BY ITS FOUNDER

Terai was set up by Dr. Verónica García with the aim of combining her scientific soul with her passion for healthy skin care and her environmental and holistic philosophy of life. Dr. García holds a degree in Chemical Sciences from the University of the Basque Country UPV/EHU and a PhD in Technology from Oulu University (Finland). She has been passionate about blends since she was a child and, over time, her interest evolved into natural cosmetics, ecology, phytotherapy and philosophies based on the impact of emotional well-being on the physical state (Aromatherapy, Bach Flower Remedies, Ayurveda, etc.).

Until 2014, Veronica focused on research in the fields of chemical and environmental engineering at universities in Finland, UK,

Peru, India and Spain. Her research work was awarded with the prize for the best thesis in chemical engineering in Finland in 2008 and 2009, and she obtained the Juan de la Cierva place at Cantabria University (2011-2014).

In 2015, she decided to venture into business, creating her own brand and doing her bit to improve the sustainability of the world of cosmetics and its holistic approach to skin care. Since then, ever aware of the latest developments in science, Terai has been evolving its range to improve the environmental impact and effectiveness of its products.

TERAI IS DESIGNED FOR RESTLESS PEOPLE WHO LOVE AUTHENTIC AND EFFECTIVE PRODUCTS.

## OUR VALUES

1

Create healthy cosmetics using natural ingredients, taking into consideration their effectiveness and origin, with absolute enthusiasm, passion and positive energy.

2

Base our philosophy on the commitment to people, the environment and animal rights.

3

Our products channel positive emotions.

4

Consider your needs when creating our products.

5

Carry out continuous research in our Biobilbao shop-laboratory in order to make the most of the infinite possibilities and benefits that nature offers us.

6

Love and respect for the environment and animals.

7

Stay true to our Bilbao origins and home-made philosophy.

## MADE IN OUR OWN LABORATORY

From the outset, we were convinced making our products in our own laboratory would be key when it comes to offering our customers the finest products. We believe that this is the best way to ensure, understand and control the entire production process first hand. In the in-house production process, our team of chemists and the ingredients blend into one, resulting in products to fall in love with: effective and sustainable. All of this is carried out in accordance with the Good Manufacturing Practices set out in the regulations, ensuring the safety of our cosmetics.

Our creation and production space is called Biobilbao. It consists of a laboratory and an adjacent shop, where direct contact with our customers enables us to research new products in accordance with their needs or improve existing products.

Biobilbao is charming and unique in appearance; its decoration, aroma and soundtrack have been especially designed for relaxation and concentration. In this way, we are able to create our Terai products in a calm and conscious way, using high quality organic ingredients, passing on the positive energy to live life well to our creations. We also organise talks, workshops and other events related to our philosophy: ecology, healthy habits and food, emotional balance, home-made cosmetics, Bach flower remedies and other alternative therapies. We also pass on this whole essence to our points of sale; we provide distance training and offer “tupper-creams”, in which we explain the reason behind their composition to our customers and the benefits they can obtain.
